

DOR changes its annual process for notifying employers of their withholding remittance schedule

New! Beginning with the notification process for the 2011 tax year, only those employers whose withholding remittance schedule will change for the next year will receive written notification from the department by November 1. Employers will not receive a letter if the frequency of their filing requirement remains the same as last year.

For employers with no changes, their notification will be the information included on the payment voucher booklet that the department mails to them in December for use in the following year.

Business Tax Express (BTE) and Taxpayer Access Point (TAP) users with no changes will be notified of their filing frequency requirement when they access their accounts on those sites after the first of the year.
